SUMMARY

I am a person who values personal development, and I am dedicated and hardworking when it comes to my responsibilities. Communication is important to me, and I enjoy listening to people's problems and seeking advice from them. I am an open-minded individual, and I am particularly interested in exploring Blockchain and Web Technologies. I am also content creator at Twitter, YouTube, Medium and LinkedIn.

EDUCATION

Bachelor of Computer Engineering   Aug 2020 - Present
Cukurova University Adana, Turkey

EXPERIENCE

Freelance Development Team Leader   Apr 2022 - Present
Bionluk (Zencir Software)

I lead our online services and work closely with clients through popular freelancer websites such as Bionluk. Our website is https://zencir.software and we specialize in web design, corporate identity, and SEO optimization services.

Web3 Fundamentals   2 Hours
Patika.dev

PROJECTS

Discord Register Bot   May 2023
Node.js Application (Open Source)

The Discord Registration Bot is a Discord bot that allows users to register to a server using a registration code and assign roles to themselves. New registration codes can be generated, and log, moderation, and registration channels can be designated. In this project, I contributed by developing the backend commands and frontend styling. I use JavaScript programming language and develop the project using Node.js. https://github.com/Kodluyoruz/discord-register-bot

Tweet Random Programmer Quote   Mar 2023
Responsive Webapp

This project was designed with Figma and after design process end, I coded with using Next.js and Tailwind.css. It is fully responsive and open source. https://tweet-random-programming-quote.vercel.app

ChatGPT CopyIt   Feb 2023
Chrome Web Store Application

It adds a copy to clipboard button end of each answer. Also, it shows word and character counter. It is published on Chrome Web Store. I used vanilla JavaScript to do it. http://chrome.google.com/webstore/detail/chatgpt-copyit/ogakgacjkoojmdahpelppalilhhplnbe

Zencir Software   Apr 2022
Responsive Website

This project was created with Adobe-XD and after design process end, I coded with using Bootstrap Framework. It is a website for my freelancer jobs. https://zencir.software

Simulation of Entrepreneurship (Unity)   Mar 2021 - Jun 2022
TUBITAK (2209-A) Project

This project uses Firebase as its database and includes modules for login, registration, and password reset. It is a web application that also incorporates two Unity WebGL builds. https://tubitak-girisim.web.app

AWARDS

Chainiversity   Chainlink Spring Hackathon 2023
Chainlink Services - Second Place ($4.000)

Chainiversity is an interactive, quest-based platform for developers who aim to excel in Solidity and Chainlink. Developers pass levels and submit solutions on-chain to earn NFT certificates. I worked on front-end. I learned Wagmi Hooks and Rainbowkit. I also practiced at Next.js and Tailwind.css. https://devpost.com/software/chainiversity
