PROFESSIONAL SUMMARY

Full Stack Developer specialized in web-based AI solutions, Retrieval Augmented Generation (RAG), and AI agents. Scalable applications designed, built, and deployed by integrating modern front-end frameworks with intelligent back-end services. Technical content on software development and AI technologies actively published.

EDUCATION

Cukurova University

Bachelor of Computer Engineering (GPA: 3.24 / 4)

Adana, Turkey
08/2020 – 07/2024

LANGUAGE SKILLS

• **English:** C1 (Advanced)

French: A1 (Elementary)

TECHNICAL SKILLS

- **Languages & Frameworks:** Python, Django, JavaScript, TypeScript, React, Next.js, Node.js, Express.js, Java, C#.
- **Databases & Cloud:** PostgreSQL, MongoDB, SQL, AWS, Snowflake, Docker, Linux.
- **AI & Tools:** RAG, LangChain, LLM, AI Agents, n8n, Git, GitHub, Jira, Postman, Microsoft Office, Google Tools.
- **Web & Design:** HTML, CSS, Tailwind CSS, Bootstrap, Figma, Adobe Photoshop, Canva.

PROFESSIONAL EXPERIENCE

Entalpi

Full Stack Developer

Istanbul, Turkey (Remote)
04/2025 – Present

- Played a role in the development and maintenance of a secure, enterprise-grade data warehouse web application, implementing Role-Based Access Control (RBAC) and Row-Level Security (RLS) to ensure data isolation.
- Contributed to AI chatbot capabilities expansion by implementing OCR for PDF document analysis and enabling natural language data interaction using Amazon Bedrock & Knowledge Bases.
- Supported the migration from Amazon Redshift to the Snowflake cloud database, including query refactoring to improve performance.
- Took part in the development and deployment of a responsive website using the Django (Python) MVT architecture on AWS Elastic Beanstalk.
- Improved the user experience for image and video uploads to AWS S3 by optimizing upload workflows.
- Built advanced data filtering features, dynamic sidebar navigation, and interactive dashboards to enable real-time analytics.
- Assisted in designing database schema architecture and optimizing PostgreSQL data models, as well as automating data pipelines through scheduled background jobs.

Rise In (Patika.dev)

DevRel Specialist

Pennsylvania, US (Remote)
11/2024 – 01/2025

- Developer ecosystem growth facilitated by organizing events, hackathons, and meetups to drive collaboration.
- Technical documentation, tutorials, and blog content produced to accelerate adoption of partner technologies.
- Technical support and hands-on workshops delivered, enabling developers to integrate partner products efficiently.
- Community feedback analyzed to bridge communication between developers and partners, improving product alignment.

Borda Tech

Product Manager (Intern)

Istanbul, Turkey
07/2024 – 09/2024

- Product vision, strategy, and problem statements defined for the Quattro AI Assistant.
- AI technologies researched and evaluated, including RAG, to support architectural decisions.
- User personas developed and competitive analysis performed to guide feature positioning.
- Stakeholder communication managed between the product team and executive leadership.

Kodluyoruz

Associate Team Member

Istanbul, Turkey (Hybrid)
07/2023 – 06/2024

- Free software training programs for youth planned, organized, and managed.
- Training curricula and community events designed and executed.
- Certificate distribution and job placement processes supported for program graduates.
- Operational efficiency improved using digital collaboration tools for program coordination.

Zencir Software

Founder & Project Manager

Adana, Turkey
04/2022 – 01/2023

- Freelance development team led to deliver custom web and branding solutions.
- End-to-end project lifecycles managed, including scope definition, timeline planning, and delivery.
- Business requirements translated into technical specifications for web and corporate identity projects.

VOLUNTEERING EXPERIENCE

Yazılım Çukurova

Founder & Lead

Adana, Turkey
10/2023 – 02/2024

- Student club founded at Cukurova University to foster a software development community.

Cukurova Blockchain

Co-Founder & Board Financial Officer

Adana, Turkey
04/2022 – 11/2023

- Student club co-founded; financial operations managed and educational activities coordinated.

Kodluyoruz

Jr. Fellow Assistant

Istanbul, Turkey
04/2023 – 08/2023

- Volunteer training delivered to children in Scratch.

KEY PROJECTS

- **Tyche (Teknofest Best Presentation Award):** Blockchain tracking platform with user-friendly features for monitoring transactions across multiple networks. Front-end interface developed and UI/UX designed. 08/2024
- **Chainiversity (Chainlink Hackathon Winner):** Interactive, quest-based platform for Solidity developers. Front-end developed using Wagmi Hooks, Rainbowkit, Next.js, and Tailwind CSS. 06/2023
- **Discord Register Bot:** Open-source Discord bot for user registration and role assignment. Backend commands and frontend styling developed using Node.js.
- **ChatGPT CopyIt:** Chrome extension adding copy functionality to ChatGPT responses. Developed using vanilla JavaScript and published on Chrome Web Store.

CERTIFICATES

- **Fundamentals of Artificial Intelligence** – Ministry of Industry and Technology 01/2025
- **McKinsey Forward Program** – McKinsey & Company 12/2024
- **Introduction to NLP: Word Operations** – Presidency Digital Transformation Office 11/2024
- **Machine Learning with Python** – BTK Akademi 11/2024
Ranked 1st in the end-of-course Datathon with a RAG-based project.
- **Jira Fundamentals Badge** – Atlassian 01/2024
- **Version Controls: Git and GitHub** – BTK Akademi 02/2023
